

SOLUTION OVERVIEW

Lighthouse Navigate™

COMPREHENSIVE VISUAL REPORTING THAT ALLOWS YOU TO MAKE INFORMED DECISIONS

Improves Forecasting

Comprehensive metrics to make data-supported decisions faster

Enhances Case Team Visibility

Financial and operational data all in one place

Allows Controlled Report Sharing

Cascading security permissions by project, user, and view

Enables Faster Decision Making

Track progress and results with up-to-date information on demand

Challenges We Address

It is challenging to centralize and understand metrics related to ediscovery due to the lack of transparency and uniformity of reporting both within and across matters. Monitoring trends and conducting evaluations of ediscovery process effectiveness are hindered by disjointed and delayed receipt of project details. These issues make it difficult for case teams to monitor and forecast their ediscovery spend and labor efficiency across the EDRM, as well as reduce costs and improve project planning.

Benefits We Provide

Lighthouse Navigate is a web-based dashboard and reporting tool that gives you on-demand visibility into important case information such as data volumes, cost savings, and spend to date. These insights allow you to make informed case decisions, create more accurate budgets, and implement and monitor effectiveness of cross-matter processes. Navigate addresses the need for an enterprise reporting resource and provides you with the ability to view, plan, compare, and forecast your data anywhere, anytime. You have access to all of your matters' activity so you can create and observe detailed metrics related to cost, time, volume, and reduction performance. Navigate alleviates visibility and comparison issues that lead to monitoring and forecasting challenges and allows you to take control of your data.

With Navigate, case visibility and decision making are enhanced and accelerated as team members from both inside and outside of your organization can access the metrics relevant to their work. Sharing and protecting sensitive information is done at your discretion by controlling viewer permission for each user. Tracking and validating the progress and results of your projects can be done on demand. In addition, forecasting and planning are made easier through access to a centralized location with financial and operational data rolled up across all of Lighthouse's services.

FEATURES:

- **Consolidation** — Select any one or all of your matters to see metrics associated with spend, volume, and data reduction figures at a glance.
- **Configuration** — Create, filter, and save the combination of reports most relevant to your needs.
- **Security** — Set cascading security permissions to control which projects or types of information are available to each user.
- **Mobility** — Access your project information from any web browser on any device. Lighthouse Navigate empowers your teams to access and share near real-time information directly addressing your ediscovery program needs. By rolling up all components of project spend into personal dashboards, you can access reports as often as you like and share access both inside and outside your organization to speed up your cost and time-saving decisions.

Summary

Lighthouse Navigate empowers your teams to access and share near real-time information directly addressing your ediscovery program needs. By rolling up all components of project spend into personal dashboards, you can access reports as often as you like and share access both inside and outside your organization to speed up your cost and time-saving decisions.

About Lighthouse

For 25 years, Lighthouse has provided innovative software and services to manage the increasingly complex landscape of enterprise data for compliance and legal teams. Lighthouse leads by developing proprietary technology that integrates with industry-leading third-party software, automating workflows, and creating an easy-to-use, end-to-end platform. Lighthouse also delivers unique proprietary applications and advisory services that are highly valuable for large, complex matters, and a new SaaS platform designed for in-house teams. Whether reacting to incidents like litigation or governmental investigations, or designing programs to proactively minimize the potential for future incidents, Lighthouse partners with multinational industry leaders, top global law firms, and the world's leading software provider as a channel partner.
