Microsoft® Office 365™ Platform Integration & Migration

MIGRATE DATA AND INTEGRATE THIRD-PARTY PLATFORMS INTO OFFICE 365 EFFICIENTLY

Identify Data
Learn to select relevant data sources that are compatible with Office 365

Map Migrations
Discover best methodologies to effectively outline migrations from experts

Migrate Data
Perform complicated migrations with proven technologies and processes

Preserve and Protect
Preserve and protect legal holds throughout the entire process

Challenges We Address

As technology continues to evolve and its capabilities expand, corporations are forced to migrate data from outdated, legacy platforms to modern, cloud-based enterprise solutions like Microsoft's Office 365. These outdated systems, which are often dependent on large data centers and costly infrastructure, require additional support and tools. Complicated processes can result in a variety of problems, such as corrupted or lost data, unsearchable and/or unreadable data, and missing data sources. Beyond disrupting day-to-day operations, a common migration problem is that legal holds may be compromised and cause problems for on going litigation and legal compliance.

Lighthouse eDiscovery's legal and technical experts are here to help you perform these complicated migration processes, with a focus on preserving legal holds throughout the migration process to ensure nothing is compromised.

Benefits We Provide

Lighthouse will work closely with your IT team to identify existing legacy data sources that are compatible with Office 365, as well as any third-party data sources that require customized migration solutions. Lighthouse will then map all sources and identify the best methodology to migrate the data. Typically, Office 365 platform integration usually comes in two forms: (1) application and/or data source integration with Office 365 (ongoing integration); and/or (2) data migration from legacy platforms.

Once the data sources and methodology have been identified and established, Lighthouse's team of experts will perform the integration and/or migration, using proven, best-in-practice technologies and processes. This allows Lighthouse to ensure an accurate platform integration, data migration, or a combination of both.

Robust reporting is available throughout the entire process. If there are migration activities where defensibility is a priority, detailed reporting will be available during and at the conclusion of your project to provide a summary of work conducted and any data sources that we were not able to migrate.

LIGHTHOUSE

SOCIAL: Twitter, Facebook, Yammer, Linkedin, etc.

MESSAGING: Yahoo Messenger, GoogleTalk, Cisco Jabber, etc.

DOCUMENT COLLABORATION: Box, Dropbox, etc.

VERTICALS: SalesForce Chatter, Thomson Reuters, Bloomberg, etc.

SMS/TEXT MESSAGING: Blackberry, MobileGuard, etc.

Summary

At Lighthouse, we accurately and efficiently migrate legacy platform data into Microsoft Office 365. Our extensive migration expertise comes from best practices gleaned from our work with Microsoft and Fortune 100 and Am Law 100 clients, and the diverse background of our IT and legal professionals.

Microsoft and Office 365 are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.

About Lighthouse

Lighthouse simplifies the complexities of ediscovery and information governance by the use of our intuitive technology solutions and comprehensive service offerings. Through our best-in-class expertise, Lighthouse stands apart as a leader in industry best practices and workflows. Our proactive, high-touch approach has enabled us to build enduring partnerships with the most respected corporations and law firms around the globe.
