PrivSmart™

PRIVILEGE REVIEW AND PRIVILEGE LOG SOLUTION

| **Lowers Costs**	**Prioritizes Privilege Review**	**Automates Privilege Log Generation**	**Adaptable and Easy To Use**
Increases speed of privilege review and privilege log creation by at least 10%, saving time and cost	Increases the speed and accuracy of privilege decisions through document categorization	Allows focus on legal privilege analysis rather than log creation, data entry, and editing	Complements existing review workflows and uses the familiar Relativity interface

Challenges We Address

Privilege review and the creation of a privilege log are among the most reviewer-intensive segments of ediscovery, taking the most time and requiring more experienced attorneys. As a result, this process accounts for a disproportionate share of review costs relative to the number of documents being addressed.
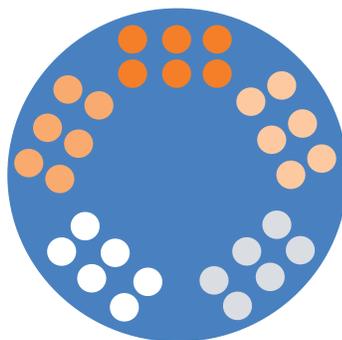

Benefits We Provide

PRIVILEGE CATEGORIZATION

Privilege Categorization can speed up privilege review by at least 10 percent and increase the accuracy of privilege designations. Instead of running search terms then painstakingly reviewing those documents, Privilege Categorization refines that analysis using definable privilege search term lists, and helps you prioritize documents according to the likelihood that they are actually privileged. Your team can decide whether to spot check low-risk documents, use less experienced, lower-billing reviewers to get through them, or exclude them from privilege review entirely.

Unorganized Privilege Data within Review Corpus

Organized into Buckets of Least and Most Likely Privileged

- Lawyer Sender/Recipient
- Lawyer Law Firm in Doc Text
- Generic Privilege Search Term Hit
- Footer Privilege Search Term Hit
- 3rd Party Sender/Recipient

LIGHTHOUSE

PRIVILEGE LOG CREATION

PrivSmart can also save dozens of hours of manual work by drafting privilege logs automatically, freeing up your time to focus on legal privilege analysis, rather than doing data entry and editing. PrivSmart predicts normalized privilege names based on document metadata, eliminating the manual work typically required for name normalization, while dynamic coding layouts help your team to refine the log during review. A user-friendly Privilege Log creation interface then guides users through the process of generating a customizable final log in a matter of minutes. Stored directly in Relativity, privilege logs offer powerful version control, an auditable history, and even the ability to track and exclude documents included in previous final logs.

Summary

By categorizing documents into groups based on their likelihood of being privilege and automating the data entry and editing of privilege logs, PrivSmart allows your teams to stay focused on case strategy, protecting privileged material, and not on tedious, time-consuming data entry tasks. Reducing review volume without reducing reviewed content - PrivSmart is a safe and effective way to quickly and cost effectively conduct first-pass privilege review and create your privilege log.

This and other examples of innovative technology, effective workflows, processes, and reporting are available through Lighthouse's SmartSeries® suite of solutions.

"While attorneys should study the rules and recent developments in their own jurisdiction, they should also be reassured that **technology can assist in generating faster, more descriptive, and more compliant privilege logs.**"
