

SOLUTION OVERVIEW

PrivSmart™

PRIVILEGE REVIEW AND PRIVILEGE LOG SOLUTION

Lowens Costs

Increases speed of privilege review and privilege log creation, saving time and cost

Prioritizes Privilege Review

Increases the speed and accuracy of privilege decisions through document categorization

Automates Privilege Log Generation

Allows focus on legal privilege analysis rather than log creation, data entry, and editing

Adaptable and Easy To Use

Complements existing review workflows and uses the familiar Relativity interface

Through its proprietary SmartSeries™ offerings, Lighthouse cuts clients' ediscovery costs by effectively and efficiently reducing the volume of data subject to review and automating workflows to analyze, categorize, and report on both relevant and privileged data. PrivSmart is a key element of the SmartSeries, as it prioritizes the first-pass privilege review and automates privilege log generation so that attorneys can focus their time on the truly privileged documents and ensure that privilege claims are defensible.

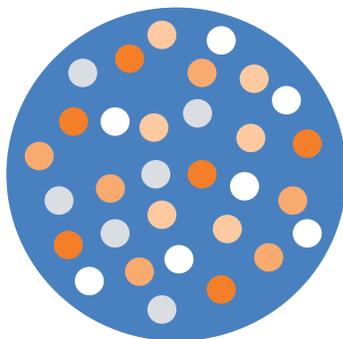

Challenges We Address

Privilege review and creation of a privilege log are among the most reviewer-intensive segments of ediscovery, taking the most time and requiring more experienced attorneys. As a result, this process accounts for a disproportionate share of review costs relative to the number of documents being addressed.

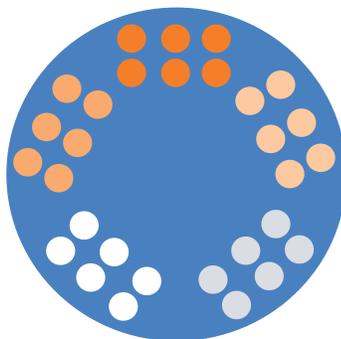

Benefits We Provide

PRIVILEGE REVIEW CATEGORIZATION

PrivSmart categorization can speed up your privilege review by at least 10 percent and increase the accuracy of your privilege designations. Instead of running search terms and then painstakingly reviewing those documents, PrivSmart refines that analysis and helps you prioritize documents according to the likelihood that they are actually privileged. Based on your risk aversion, you can then decide whether to spot-check low-risk documents; use less experienced, lower-billing reviewers to get through them; or exclude them from privilege review entirely.

Unorganized Privilege Data within Review Corpus

Organized into Buckets of Least and Most Likely Privileged

- Lawyer Sender/Recipient
- Lawyer Law Firm in Doc Text
- Generic Privilege Search Term Hit
- Footer Privilege Search Term Hit
- 3rd Party Sender/Recipient

PRIVILEGE LOG CREATION

PrivSmart can also save dozens of hours of manual work by creating privilege logs automatically, freeing up your time to focus on legal privilege analysis, rather than doing data entry and editing. PrivSmart also predicts normalized names which will appear on the privilege log based on document metadata, eliminating the manual work typically required for name normalization. Normalized names and privilege descriptions are automatically included in the draft privilege log, which is fully editable within Relativity. Our Privilege Log creation wizard then guides you through the process of generating your final log in a matter of minutes, and storing your privilege logs in a centralized repository within Relativity, eliminating version control challenges.

Summary

PrivSmart allows your teams to focus on protecting privileged material and defending your privilege log. By categorizing documents into groups based on their likelihood of being privilege, your reviewers can make more accurate privilege calls. By automating the data entry and editing of privilege logs, PrivSmart allows your teams to focus on ensuring the descriptions comply with the legal requirements of the relevant jurisdiction. Reducing review volume without reducing reviewed content—PrivSmart is a safe and effective way to quickly and cost effectively conduct first-pass privilege review and create your privilege log. This and other examples of efficient and effective workflow, process, and reporting are available through Lighthouse's SmartSeries.

"While attorneys should study the rules and recent developments in their own jurisdiction, they should also be reassured that technology can assist in generating faster, more descriptive, and more compliant privilege logs."
