

SOLUTION OVERVIEW

LIGHTHOUSE CloudCompass

for Microsoft 365

A complete services program designed to keep you ahead of change in the dynamic cloud computing landscape.

MITIGATE LEGAL AND COMPLIANCE RISK CAUSED BY CONTINUOUS CHANGE IN CLOUD TECHNOLOGIES.

Challenges We Address

As businesses seek to reap the benefits of moving to the Cloud (Microsoft 365 in most cases), they are faced with new challenges and risks. Productivity software and collaboration platforms such as Teams, Skype, Slack, and Yammer present a new way of communicating and file sharing that challenge traditional approaches to ediscovery, records management, data protection, and other legal and compliance programs. Understanding the data that is created, where it is stored, and what features are available to support legal and compliance is not easy. Subsequently, teams must update their workflows, processes, and automations in a legally defensible manner. Once this occurs, these teams must keep informed of continual product updates, assess their potential impact and, if necessary, re-align processes. This is a never-ending process that requires constant attention, diligence, and expertise.

Staying abreast of changes, assessing impact, and adapting processes is critical for business continuity, managing risk, and establishing a legally defensible process in the face of a challenge. Getting there is a pursuit that requires a deep focus and commitment coupled with a unique mix of specialized technology and legal expertise that is difficult for legal and compliance teams to source and manage alone.

Benefits We Provide

Lighthouse CloudCompass is a program designed to keep businesses ahead of change in the ever-shifting cloud landscape. Our team of experts in cloud technology, information governance, and ediscovery are leading the market in cloud consulting services for legal and compliance teams. CloudCompass expert services are focused on helping you mitigate risk and better manage the dynamic and complex nature of this space to assure that data is managed defensibly. For more than 20 years, our partnership with Microsoft has afforded us a level of product knowledge that is unmatched by any other provider, giving us the insight to provide effective strategies for both current and forthcoming releases of Microsoft 365. Our tiered approach provides a variety of packages to suit each unique business requirement, covering a range of critical services across several areas: education, assessment, certification, implementation, and managed services.

With Lighthouse CloudCompass, you can stay ahead of change in the Cloud without shouldering the lift and cost of internalizing specialty resources. And, with our deep partnerships and proven track record of success, Lighthouse is the trusted partner to assure that information governance and ediscovery programs are compliant and current.

WHY LIGHTHOUSE CLOUDCOMPASS?

- **Proactive Strategy** — Our specialized teams continuously keep pulse on the changing technology landscape, hyperfocused on both the technical implications and legal impacts to provide preemptive solutions to evolve your organization's ediscovery and information governance programs.
- **Proven Expertise** — With more than 25 years of ediscovery experience, we provide comprehensive strategies and best practices to ensure ediscovery and information governance programs surpass stringent compliance requirements while reducing risk and cost.
- **Elite Partnership** — Lighthouse is THE premier Microsoft partner for ediscovery and compliance. Our deep-seated partnership with Microsoft is built on trust and a more than 20 year collaboration, resulting in exclusive access to product insights and roadmaps.

Summary

Lighthouse CloudCompass is a complete program of services based on our highly specialized and deep expertise, coupled with insider technology insight by virtue of our elite partnership with Microsoft and other technology providers. With CloudCompass, you can be assured that your information governance and ediscovery programs will stay out in front of change to maintain a compliant and defensible status.

About Lighthouse

For 25 years, Lighthouse has provided innovative software and services to manage the increasingly complex landscape of enterprise data for compliance and legal teams. Lighthouse leads by developing proprietary technology that integrates with industry-leading third-party software, automating workflows, and creating an easy-to-use, end-to-end platform. Lighthouse also delivers unique proprietary applications and advisory services that are highly valuable for large, complex matters, and a new SaaS platform designed for in-house teams. Whether reacting to incidents like litigation or governmental investigations, or designing programs to proactively minimize the potential for future incidents, Lighthouse partners with multinational industry leaders, top global law firms, and the world's leading software provider as a channel partner.

Connect with us to see how Lighthouse can best support you.
